

JUST CLEANINGS

WHEAT USED IN AUSTRALIA

TO MAKE POWER ALCOHOL.
Four plants for the manufacture of power alcohol from wheat are to be erected in Australia, according to a survey received by the North West Line Elevators Association. The distilleries are to be erected in each of the four states of the Commonwealth and each will have a capacity of 3,000,000 gallons annually.

The North-West Line Elevators Association completed a survey three years ago on the possibility of manufacturing power alcohol from Canada's surplus wheat stocks. Following this survey the Line Elevators laid this report before the Canadian government as a possible means of creating new markets for 50,000,000 bushels of Canadian wheat annually.

R. P. Bower, assistant Canadian trade commissioner in Australia, has reported to the Canadian government that with wheat costing approximately 70 cents per bushel it is estimated that 30 cents per gallon. A committee of inquiry appointed by the Government of Australia reports that the cost of erecting a 4,000,000-gallon-a-year plant is \$1,400,000. The bushel of wheat yields two and one-half gallons of power alcohol. By adding a 15 per cent mixture of power alcohol to ordinary gasoline, the efficiency of fifteen points.

T. J. KING ELECTED AS PRESIDENT OF CARBON OLD TIMERS' ASSOCIATION

The annual general meeting of the Carbon Old Timers' Association was held on Saturday, December 6th, and the following officers were elected for the ensuing year:

President, T. J. King.
Vice-President, W. R. Van Loon.
Secretary-Treasurer, W. A. Braisher.
Executive Committee: T. J. King, W. R. Van Loon, W. A. Braisher, C. H. Nash, Mrs. Van Loon, W. M. Douglas, and Mrs. Cadman.

It was decided to hold a dance on February 11th, 1912, open to the general public, and consisting of a program of new and old time dances. The secretary-treasurer's report showed a balance on hand of \$129.25. A hearty vote of thanks was passed to the retiring president, C. H. Nash, and to the Secretary and Executive Committee.

FOR SALE—Vega Cream Separator, bench style, Ed Martin, Newcastle.

R.C.A.F. RECRUITING OFFICER TO VISIT CARBON DEC. 19

Listed hereunder are the towns which an officer from the R.C.A.F. Recruiting Centre, Calgary, will visit during the period stated below, for the purpose of interviewing persons in these districts who are desirous of making application for enlistment in the Royal Canadian Air Force.

Big Valley, Dec. 15, 2 p.m. to 5 p.m.
Drumheller, 2 p.m., Dec. 17th, to 5 p.m., December 18.
Rosedale, Dec. 18, 7 p.m. to 10 p.m.
Carbon, Dec. 19, 2 p.m. to 5 p.m.

A Medical Officer will also be in attendance on this trip.
In connection with the visit a short program of moving pictures dealing with the War effort and the R.C.A.F. will be shown, lasting about an hour. Admission is free and the picture will be shown in the Farmers' Exchange Hall, commencing at 2 p.m.

CARBON AND DISTRICT

NEWS NOTES

Miss Sylvia Atkinson, telephone operator at Three Hills, visited at the home of her parents in Carbon on Sunday.

Mr. and Mrs. Len Foxon and Dale spent Monday in Calgary.

Mrs. Frank Halstead and Patty of Calgary were Sunday visitors in Carbon with Mr. and Mrs. John Atkinson and Mr. and Mrs. C. H. Nash.

Mike Skerry has been flooding at the rink during the past week and it will not be long before the "roarin'" game will once more be played in Carbon.

Mrs. McLandress of Calgary arrived last Saturday and is visiting with Const. and Mrs. F. A. Amy.

Mr. and Mrs. A. P. McKibbin were Carbon visitors the first of the week, returning Tuesday evening.

Supt. R. E. Mercer, in charge of Calgary Sub-Division of the R.C.M.P., inspected the Carbon detachment on Tuesday.

Mr. and Mrs. Sam Foxon of Drumheller spent last Thursday evening in town.

Johnny Gouldie met with an unfortunate accident last Saturday when he fell from a horse and fractured his leg.

Mr. and Mrs. A. C. Creamer were in Calgary a couple of days this week when Claude attended a convention of McGill Frontiers agents.

The Junior bridge club entertained their members last Wednesday evening at the home of Mrs. Harney, with Mrs. Henry Embree as co-hostess. Mrs. J. W. Smith won high honors for the ladies, and Const. Amy had high score for the gentlemen.

E. J. C. Books of Acme was re-elected president of the Alberta Shortland Brothers' Association at the annual convention in Calgary recently. W. D. MacDonald of Granger, and Stewart Hay of Carbon were among the directors elected.

Ed Martin peddled up from Newcastle on his bicycle last Saturday and visited with Mr. and Mrs. Otto Martin.

V. Grose moved a house from the Otto Martin farm into town on Friday and put it on a foundation next to the A. J. McLeod residence.

Mr. and Mrs. B. C. Downey were Calgary visitors last week.

The Carbon Boy Scouts and Cubs enjoyed a skating party on the creek Saturday afternoon.

The weather still seems to be unsettled Wednesday, and a light snow flurry Tuesday brought indications of winter.

TURKEY PRICES REGULATED

Prices for Christmas turkeys in Canada this season will find their own levels in relation to a maximum price of 21 cents per lb. at Vancouver and 32 cents per lb. at Montreal and Toronto for dressed birds, Grade A, in ear lots.

These "ceiling" prices were announced in a statement issued recently by the Wartime Prices and Trade Board. Because relatively few turkeys other than storage stocks were sold during the base period, Sept. 15 to October 11, it was necessary for the Board to decide on a price level. This was done after careful consideration of all points of view, the producer, the trader, and the consumer.

The statement as announced permits customary premiums for quality with the provision that they do not exceed the set maximum price by more than 2 cents per lb.

TEMPORARY COMMITTEE NAMED TO CONDUCT THE SALVAGE CAMPAIGN

Andrew Shelnie, organizer of committees for Alberta and British Columbia to conduct salvage campaigns, addressed a gathering of interested citizens last Wednesday morning in the Municipal office and as a result the following temporary officers were elected to carry on until a permanent meeting can be called to form a permanent organization.

President, S. N. Wright.
Vice-President, F. E. Priebe.
Secretary, Const. F. A. Amy.
Mr. Shelnie pointed out that scrap material was urgently needed and that magazines, paper, bones, rags and metals were among the items required. It is the intention of the Carbon Salvage Committee, after permanent organization, to conduct an intensive campaign in the collection of scrap material, and it is hoped that the public in general will co-operate in every way possible.

WINNERS OF RAFFLE PRIZES

The Ladies of the Carbon Catholic Church held a successful tea and raffle in the Scout Hall on Saturday, December 6th, with the extra proceeds going to a 5¢ War Savings Certificate. Verna Dresser of Rockyford won a pair of gloves. Father Killen was a turkey. M. M. Currie won a ton of coal. Mr. Glen of Calgary was \$15 in cash, and Tom Fong won a pair of pillowslips.

The Church wishes to thank all who helped to make the tea and raffle a success.

Rev. R. R. Hinckley was a Calgary visitor the first of the week.

Just 11 more shopping days until Christmas. Don't delay any longer—order your gifts immediately at the local stores. Our advertisers in this issue offer you a complete line of goods suitable for gifts.

Mr. Torrance spent the first part of the week in Calgary.

FOR SALE OR RENT—3 roomed house in Carbon, with extra room for particulars write to the owner, E. J. Martin, Newcastle Post Office, Drumheller, Alberta.

Mrs. Ernie Nelson and son Lloyd of Rockyford arrived Monday and are visiting with Mr. and Mrs. John Atkinson Sr.

LOST—Small brown purse containing sum of money and list of names. Finder please return to Robert Garth, Carbon.

Place your order for Counter Check Books. The Chronicle Office. We are direct factory representatives and can quote you the same prices, delivered. We have all latest pads, as can any traveller or salesman soliciting orders. Buy in Carbon whenever possible and especially when it does not cost you any more to do so.

THE WORLD OF WHEAT REVIEWED WEEKLY BY MAJOR H.G.L. STRANGE

Farmers have had another year's experience with different wheat varieties, but many are still asking "Which variety is the best?" Definite advice about the best variety for an individual farm cannot be given, but some sound suggestions can be made. In Manitoba and in the Eastern part of Saskatchewan only rust-resistant varieties should be grown. "Crop Testing Plan" Agents, after discussion with farmers, report that denunciation from farmers for new seed will be for the following varieties in order of the quantities required: Thatcher, Regent, Benbow and Apex. In Western Saskatchewan Narquois and Reliance still do well and will be in demand. In Alberta, usually considered out of the rust area, Agents report demand for seed will be in the following order: Red Bob, Marquis, and Thatcher, with some demand for Regent.

Any of the varieties named will give any farmer reasonable satisfaction. Some varieties, however, will do somewhat better than others in a particular district and even on a particular farm. A farmer can only discover which variety is actually the best for himself by watching the results of the seed in his own district, and perhaps by making a small variety test on his own farm.

NAVY LEAGUE COLLECTS \$17.25 FROM CARBON CITIZENS

Ballying to support the Navy League of Canada in its work of assisting widows and orphans of men of the Merchant Marine and their dependents; maintaining sailors homes and institutions in our large Canadian ports from coast to coast and looking after the welfare of the seamen when ashore; training boys and young men and helping to make better Canadian citizens of them, the people of Carbon on Thursday subscribed \$17.25 to this cause, when Fred Cooke, organizer of the Alberta Division, made the rounds.

REGULAR MEETING OF COUNCIL OF MUNICIPAL DISTRICT OF CARBON

The regular meeting of the Council of the Municipal District of Carbon was held on Tuesday, December 3rd, with Horve J. R. McEwan, and Councillors J. J. Oshauer, C. B. Gwyn, H. H. Crowell, H. Oiler and J. Olsen present. A report was received on the road leading out of the creek near the Godding farm and the Council decided that no road work would be done there at the present time.

A communication from the Drumheller Municipal Hospital asked for contributions to the isolation hospital. But Council decided that they would not contribute funds except in cases of Infantile Paralysis.

A donation of \$25.00 was made to the Institute for the Blind. J. R. McEwan and C. B. Gwyn, delegates to the Municipal District Association convention, reported on the proceedings and stated that the main question discussed was the amalgamation of municipal districts. The Association was opposed to this scheme, unless approved by a referendum.

Miscellaneous communications and accounts were dealt with and the council adjourned to meet again on January 6, 1912.

CARBON STORES NEARLY ALL DECORATED FOR THE COMING FESTIVE SEASON

The festive season has rolled around again, despite war clouds, and a visit through the stores in Carbon shows that they are ready for the Christmas season.

The local merchants realize the necessity of keeping their stocks up-to-date, and in addition to their Christmas goods they have full lines of reasonable articles.

The grocery stores are all so clean, bright and inviting, and the stocks of Christmas candies and good things for the table make one almost wish that Christmas was here.

The dry goods stores are replete with everything for winter wear and are showing innumerable articles of wool which make Christmas gifts of the more useful kind, many of them all wrapped and boxed, ready for giving.

The hardware stores and drug store are showing a splendid display of goods of china, silverware, books, dolls, toys and novelties, are a veritable Santa Claus Land, and will be the centre of interest with people generally, and the younger people in particular.

Even the garages are not backward and you can find Christmas gifts for the family and the car—hot water heaters, hood covers, radiators and many other gadgets suitable for gifts.

Look around the local stores and you will find almost anything you need for the Christmas season. Buy in Carbon this year and patronize the advertisers in this paper. They are inviting you to shop in their store and by so doing they assure you of quality goods at reasonable prices.

Send or bring in any news items that you may know of. The Chronicle is always glad to get local news items and in many cases these are only available from the people involved.

Rare Metals Used In The Prosecution Of War Are Now Mined In Canada

Mercury in precision instruments being used by British and Canadian forces is being provided by one of Canada's newest industries. Prior to the war this country imported practically its entire supply of mercury, now it produces sufficient for all Canadian requirements and exports considerable quantities to Britain.

The development of mercury production is one phase of a general speed-up in many branches of Canadian mining and an intensified search for strategic metals required for war purposes.

Across Canada geologists from the department of mines and individual prospectors, encouraged by the government, are searching likely areas. The discovery of a deposit of cinnabar, an ore of mercury, near Pouch Lake, B.C., by a government geologist, in 1937 opened the way for this new industry.

The deposit is now providing more than sufficient mercury to replace that previously imported from Italy and during the past summer a survey of the region disclosed an additional deposit 100 miles long and from eight to 10 feet thick.

Antimony provides another example of recent development. Required for alloys in storage batteries and for bearing and ball bearings, rubber goods and paints it was almost entirely imported prior to 1934. An electrolytic plant, owned by the B.C. Electric Co., in that year provides more than sufficient to meet Canadian needs.

Canada's production of chromium slumped following attack of the First Great War and has been small and irregular for the past 20 years. Main source of the metal is eastern Quebec and a mill with a daily capacity of 100 tons is now being erected to boost the present production of a few tons a week.

A new mill under construction at Gowan Lake, N.B., for manganese production will also have a capacity of 100 tons a day and surveys are being made to locate further deposits. Tonnages of this ore at present in sight are far from sufficient to meet the needs of Canada's steel industry.

One of the most important war metals is tungsten, used chiefly as an alloy in the making of high quality steel and cutting tools. Scheelite is the chief Canadian ore from which tungsten can be obtained and is found largely in gold-bearing veins, but seldom in quantities sufficient to be mined at a profit.

Gold mines in Ontario and Quebec, and even in such distant points as British Columbia and Mayo, Yukon, are shipping this ore to the mines and geology branch at Ottawa which the only Canadian company to make high grade scheelite concentrates from run-of-mine ore. None of the scheelite now being obtained from Canadian gold mines is being mined at a profit.

No tin was produced in Canada before the war but tin is now being come coming from Trail, B.C., as a by-product of lead-zinc-silver operations. Investigation is under way for Canada's supply of antimony required for the manufacture of aviation spark plugs.

Changed His Route

Man Had Ready Answer To Hostile Attorney's Question

For more than an hour the well-mannered little man in the witness box had squirmed helplessly under the cold, hostile questioning of the opposing counsel.

"You say," prompted the attorney, "that you have crossed the Atlantic seven times."

"Yes, sir," replied the witness. "And where were you born?"

"Here in New York," he replied.

"Then, sir," thundered the lawyer, "if you were born in New York and have crossed the Atlantic seven times, how does it happen that you aren't on the other side at this moment? Answer me that!"

"Because, sir," replied the witness quietly, "on my last trip I came home by way of Siberia and the Pacific Ocean."

A Good Manager

The fellow announced to a group of friends that he had been made manager of the First National Bank. One friend looked skeptical.

"You couldn't hold a job like that," he remarked. "What have you ever managed before?"

The fellow smiled condescendingly. "I managed to marry the president's daughter," he said.

Iron ore was first mined and smelted in the province of Quebec early in the 18th century.

Use Of Vitamins

Wheat Germ Very Beneficial In Feeding Animals And Poultry

Knowledge of the use of vitamins in animal feeding is developing very fast. Dr. E. Cliffe, head of the animal research department of Ogilvie Flour Mills, Montreal, stated, "In wartime, with British needing food supplies from Canada, this fact is a very fortunate one. Dr. Cliffe said. The addition of wheat germ to animal and fowl diets secures faster growth in livestock and poultry, and also greater egg and milk production. Hence more supplies are available for Britain without creating a local shortage."

In fur farming the addition of wheat germ has affected fur color and development. In regard to hog raising, where without wheat germ it would take a farmer seven months to raise a hog, its addition would decrease the period to five months, Dr. Cliffe said. Wheat germ also drastically reduces the mortality rate among animals and fowls.

Specially processed wheat germ, in powder form, is also finding wide use among medical men for overcoming many deficiency diseases, Dr. Cliffe added. It helps create resistance to disease, and has a high nutritional value. — Winnipeg Free Press.

Steel For The War

Britain is throwing a whole railway into the mobilization of iron and steel for the war. Although it is an old railway, its rails alone will add to the resources of Britain enough steel for no fewer than 384,000 rifles.

Until 1937 the rails of the Welsh Highland railway, which were some of the loveliest scenery in the principality. But in that year they ceased to function and the grass began to grow along its 38 miles of permanent way.

Now the rails, which are modern, are being taken up, 1,200 tons of them. They will be re-laid chiefly on sidings needed for the war effort, so setting free steel-making capacity for armaments manufacture.

The two old locomotives are for the dismantler's yard and metal from the rolling stock is for the same destination.

When Danger Threatened

Says Germany Planned Last Canada Invasion

Carl Hambro, head of the Norwegian government, said that he believes Germany planned last year to invade Canada by way of Iceland and had invested fleets building in Norwegian harbors.

President Hambro was in Toronto for a visit and was accompanied by Norwegian airmen are being trained. He continued:

"The threat has passed now. The fleets of boats moored in Norwegian harbors have been disbanded. But we have no doubt that the invasion of Canada was actually planned. For North Americans are far too distant to realize the Nazi aims—and too honest to understand the criminal mentality of some nations."

Sugar In Britain

Home Growth Beets Provide All The Sugar Required

Behind Lord Woolton's decision to increase the sugar ration from 8 to 12 ounces lies a triumph of British agriculture.

Home-grown sugar beet now provides the whole of the domestic sugar ration, thanks to State encouragement in the inter-war years when farming was otherwise largely neglected.

To-day after two years of war, sugar is not only cheap but plentiful, and it is not dependent on the issue of the battle of the Atlantic.

"Because, sir," replied the witness quietly, "on my last trip I came home by way of Siberia and the Pacific Ocean."

A Ministry of Agriculture official said to-day: "Next year we hope to do even better. We now have 350,000 acres under sugar beet. For next year, we aim at 405,000 acres—London Star.

An Early Custom

During the 18th century, finger bowls were used to wash glasses. So too, the various bouquets of the wines served with dinner should not be confused, guests were given a glass before wine. In these times, guests were given their glasses before wine.

Germany has trained parachute troops since 1935. 2440

DIVE BOMBERS PREPARE FOR WAR EXERCISES

This group of U.S. Navy "dive bombers" is flying in right echelon, preparing for the army's Carolina exercises. It was the United States Navy which conceived the art of bombing and its aviators were highly commended for their dive bombing during the army's recent manoeuvres in Louisiana. In addition to this squadron, the navy sent one squadron of observation planes to the Carolina, while the U.S. Marine Corps sent two squadrons of fighters.

Canadian Navy

Playing An Important Role In The Battle Of The Atlantic

Capt. F. L. Houghton, director of the plans and signals division, Royal Canadian Navy, told a luncheon gathering at Montreal that the Canadian navy was "not only playing a supporting role in guarding the Atlantic but has actually been given one of the leading parts on this stormy stage." He said the Atlantic but has actually been given one of the leading parts on this stormy stage.

"The assumption of this responsibility," said Capt. Houghton, "must be a matter of the greatest pride not only to the navy but to the whole of Canada. With the battle of the Atlantic spreading slowly but surely farther to the westward the majority of our ships are fully occupied in the western Atlantic and in Canadian home waters."

"V" For Victory

Has Placed On Use Of Symbol For Commercial Purposes

As was bound to happen sooner or later, the government has been forced to take cognizance of the use of the "V" symbol for questionable purposes. It has placed a ban on employing it for commercial gain.

It is unfortunate that this symbol, conceived from the highest motives, has been so cheapened as it has been in Canada. The authorities could do little to curb some uses to which it is being put, but it can at least stop the commercialization of the device that should mean so much—Windsor Star.

Made Plenty Of Noise

A young R.A.F. squadron leader on reconnaissance over Western Germany couldn't resist a temptation to "bomb" Berchtesgaden, Hitler's mountain retreat. Having no bombs he bombed steeply and tossed out an empty bottle making more noise than a light of "screamers."

Port Royal, now Annapolis, N.S., was founded in 1605.

Lovely Crochet That's So Easy

Whether it's for your home or for a gift, this "Home Sweet Home" chair set is very appropriate. Lovely in design, it costs little and is simple to crochet. Pattern 7108 contains charts and directions for making set; illustrations of set and of stitches; materials needed. To obtain this set in color (stamps cannot be reproduced) send 15c to Household Arts Department, Winnipeg Newspaper Union, 170 McDermott Avenue E., Winnipeg, Man.

There is no Alice Brooks pattern book published.

The Effective Resistance Of Russian Army Came As A Surprise To Military Experts

Career Is Ended

But Adventures Of Ark Royal Were Many And Varied

The aircraft carrier Ark Royal is really sunk at last. The British Admiralty announced the fact. Fortunately the casualties were small. That is the only consolation that attends the loss of a gallant ship, which, like another gallant ship recently lost, the Cossack, had won a place of affection in the hearts of the British public, because of her exploits and the impressive manner in which she popped up in all sorts of tight places after the Germans or Italians had claimed she was sunk or badly damaged.

The Axis propaganda departments must have given a sigh of relief to know that she is gone. She has been a thorn in their sides. She would insist on carrying out the practice of rearmament. Her very material shoot must have haunted Goebbels and Geyda until at the mention of her name they had the jittery like Macbeth without the dagger.

The career of the Ark Royal, now published by the Admiralty, is interesting as showing the extraordinary expanse of territory, and the variety of adventures carried out by one of the British ships, and which probably not unusual so far as securing the seas looking for the enemy is concerned. After coastal work, which she was heavily attacked—and declared sunk—by German planes, she went to the Spanish coast in search of the Chilean. She covered 4,500,000 square miles in the Atlantic looking for raiders, steaming 500 miles a day for weeks on end. Next she went to the Mediterranean then to Norway, then back to the Mediterranean.

She was out in the Atlantic again on the trail of the Bismarck. Finally, in the Mediterranean once more, where, after a wonderful record of accomplishment, she met her end.

But that was in the day's work for the Ark Royal. Her life was not happy; her death glorious—St. Thomas Times-Journal.

Helping Hands

Everyone Willing To Do Things For Soldier On Leave

A soldier on leave, fully equipped with the usual load, got off a bus in the city says the Birmingham Post. Lowering kitbag to the pavement, he deposited his suitcase by its side and adjusted the angle of his rifle and steel helmet. He was about to lift his suitcase when a civilian rushed up and helped him. Just then another man came along and held the suitcase until the owner was ready for it.

Moreover, the assistance rendered, was determined to also do his bit, so he took out a cigarette and placed it between the Tommy's lips and then provided the necessary light.

He then placed his suitcase on the pavement once again to enable him to salute his helpers, and gathering himself together for the second time, marched off with a happy grin.

Russia Thanks Red Cross

Thankful For Comforts Sent To Poles In Russia

"National office in Toronto lately received from the Overseas Office, copy of a cable from the Polish Ambassador, reading:

"I have already heard magnificent gift comforts which Canadian Red Cross Society supplied Poles in Russia and should like to tell you how deeply grateful I am to you for noble gesture (stop) I was indeed profoundly touched as I know only too well what the dire need our people in Russia are of such articles (stop) On behalf of my fellow countrymen who have suffered so much already and whose sufferings have not yet ceased I thank you most sincerely for this great humanitarian help which pray God will arrive in time to alleviate their pitiful plight."—Edward Maczynski.

Will Be Interesting

Britain plans a series of booklets describing naval operations, the first of the Admiralty. A. V. Alexander, first lord, told a House of Commons gathering. It is hoped to include accounts of the various operations, and destroyers on the various naval fronts.

India and Ceylon annually grow 35.7 per cent. of the world's tea.

The effectiveness of the resistance

which the Russians have been offering to the Nazis onslaught has certainly upset the calculations of the German general staff, and it seemed to have surprised the military experts. But the casualties were small, but in view of the high estimate of the quality of Russia's fighting forces formed by prominent British soldiers, it should not have come as a complete surprise to the British general staff.

In a booklet styled "The Red Army," by the Hon. Ivor Montagu, no less distinguished a soldier than Sir Archibald Hamilton is quoted as having made the following observations to Russian military chiefs after inspecting some manoeuvres of their troops.

"Your commanding personnel has made an impression on us, as also has the high level of their preparedness. The presence of such commanders elevated the military position is worthy of note. Your commanding personnel is of younger age than in a number of other armies, in particular the British army. This is a favorable feature. The high quality of your machine at manoeuvres has shown a high degree of technical knowledge."

Montagu also refers in his book to the high quality of the comments by General Sir Charles Martel, who now commands the British Royal Armored Corps, who wrote:

"The utilization of tanks which I observed must be considered brilliant. The material is very good. The fact that the very tanks in the middle of battle were thrown out of action, the result of failure during the whole of the manoeuvres, and also the absence of accidents, and your high technical and mechanical personnel."

Montagu also refers in his book to the high quality of the comments by General Sir Charles Martel, who now commands the British Royal Armored Corps, who wrote:

"The utilization of tanks which I observed must be considered brilliant. The material is very good. The fact that the very tanks in the middle of battle were thrown out of action, the result of failure during the whole of the manoeuvres, and also the absence of accidents, and your high technical and mechanical personnel."

Montagu also refers in his book to the high quality of the comments by General Sir Charles Martel, who now commands the British Royal Armored Corps, who wrote:

"The utilization of tanks which I observed must be considered brilliant. The material is very good. The fact that the very tanks in the middle of battle were thrown out of action, the result of failure during the whole of the manoeuvres, and also the absence of accidents, and your high technical and mechanical personnel."

Montagu also refers in his book to the high quality of the comments by General Sir Charles Martel, who now commands the British Royal Armored Corps, who wrote:

"The utilization of tanks which I observed must be considered brilliant. The material is very good. The fact that the very tanks in the middle of battle were thrown out of action, the result of failure during the whole of the manoeuvres, and also the absence of accidents, and your high technical and mechanical personnel."

Montagu also refers in his book to the high quality of the comments by General Sir Charles Martel, who now commands the British Royal Armored Corps, who wrote:

"The utilization of tanks which I observed must be considered brilliant. The material is very good. The fact that the very tanks in the middle of battle were thrown out of action, the result of failure during the whole of the manoeuvres, and also the absence of accidents, and your high technical and mechanical personnel."

German Strategy

If Invasion Is Attempted Nazis May Land In Ireland

The magazine Aeroplane warned that the "most likely" strategy of a German invasion attempt would be to land waves of glider-borne troops and tanks in Ireland.

"A German attack is not likely immediately, but it may not be far off," the widely-read publication said. "If the Irish insist on becoming an ally of the United States, they will not even the United States, can do anything about it, but when the trouble comes the Irish will just have as much difficulty standing as they had in Belgium."

WORLD HAPPENINGS BRIEFLY TOLD

In one month troops in training in Canada made use of Y.M.C.A. facilities 1,500,000 times.

On every three post office workers in Britain have joined the navy, army, air force, civil defence service or home guard—a total of 113,000.

Using wood and other materials from bombed buildings, men and women of London fire stations used their spare time making 1,000 toys for children evacuated from the capital.

The "Aeroplane" says a special plastic container for dropping gasoline and water supplies from airplanes, with or without parachutes, has been produced in India by research director, S. S. Bhattacharya.

Landing of a British army in Europe would make Gallipoli look like child's play. High Commissioner Sir Ronald Cross said in explaining difficulties of an immediate offensive.

Lord Beaverbrook told a private meeting of representatives of all parties in the House of Commons that as minister of supply he needs a far greater labor force for war production.

Commissions in the Women's Auxiliary Air Force now are open to women suitable for training as weather forecasters in the meteorological branch of the Royal Air Force.

Between Two Fears

London Paper Says Switzerland Is Losing Economic Independence

Landlocked Switzerland is rapidly losing the measure of economic independence she enjoyed despite the war, before the collapse of France, the London Economist said in a review of the Swiss trade and economic situation.

"Outwardly, there is hardly any change in the 'war economy' that was organized in Switzerland at the beginning of the war," the Economist said.

"Then, large stocks of foodstuffs and raw materials prevented serious difficulties; but now these stocks are disappearing, and industrial self-sufficiency is not possible in a mountainous country without coal, iron or metal resources."

Swiss industry was caught between two fears. On the one hand the elaborate organization of the "war economy" was thought to be a menace to private industry; on the other hand, without it German economic penetration would find no obstacle.

"If Germany decided to end Swiss industrial activity or to put pressure on the country, the collapse of sales of coal and iron and steel manufactures would be sufficient," the Economist said.

Still Being Tested

Soldiers Have Tried Out New Type of Body Armor

A new type of lightweight body armor has been issued to several divisions of Britain's new army.

Soldiers said they did not feel the additional burden after exercises in full fighting order including double-quick advances, periods without food and swimming across rivers.

The armor was perfected after more than two years of experimentation, authorities said. It is still undergoing tests.

The new armor's total weight is only about two pounds. It is padded inside and made in three sections. Details are a military secret.

Strong Polish Force

A Polish force of one hundred thousand men will soon be ready to fight against the Germans in Russia. They should be able to strike a righteous blow for victory, for never has the cause of armed men been more just.

Not all penguins live in the frozen Antarctic. The Galapagos penguin lives in the Galapagos islands, which lie on the equator.

Germany has travelling grocery stores, mounted on trucks, covering daily routes around Berlin.

Smaller Turkeys

Are Being Developed In State College Of North Carolina

Rays of cheery news slip through the warden's pall now and then. One of these pleasant glimmers of hope is the tip from the Farm Research Division of the North Carolina State College that a small turkey is being developed for the market, says the New York Times.

As the average American home shrinks in number of rooms and in size of refrigerator and oven, the annual bird of the nation is following suit. Thousands of victims of the large turkey to which the country has been accustomed these many years will halt this information joyfully.

Turkey is all right with most of us for one day at a time, and probably for a second day. But turkey that lingers on in various forms and guises through an entire week, appearing now as cold cuts, now as stew, now as croquettes, later as hash and finally as soup, outlasts its welcome and outlasts the enthusiasm of its consumer. One can have too much of a good thing, even turkey. One can be fed up with it.

YOUNG-LOOKING TWO-PIECE

By Anne Adams

4915

The newogue for the supple, long-waisted look is interpreted by Anne Adams in this two-piece frock that is so practical and young! The blouse of Pattern 4915 buttons down the front and is becomingly gathered at the centre panel. The three-quarter length skirt is new and makes them full-length or short. The skirt is gracefully cut in only three sections, which shortens sewing time. Why not plan two versions of this frock, and use the transfer motif on the jacket or one? The leaves may be appliqued and the stems embroidered in easy stitches. The other frock might have a contrast skirt, a tiny collar. Pattern includes Sewing Instructor.

Pattern 4915 is available in misses' sizes 12, 14, 16, 18 and 20. Size 16, three-quarter sleeve dress, takes 4½ yards 39 inch fabric; long sleeve dress, 2½ yards 34 inch fabric.

Send twenty cents (20c) in coins (stamp cannot be accepted) for this Anne Adams pattern. Write plainly: Size, Name, Address and Style Number, and send orders to: The Anne Adams Pattern Dept., Winnipeg Newspaper Distrib., 175 McDermott Ave. E., Winnipeg, Man.

A country hotel in Spain displays notice: "Don't go to bed without removing your clothes."

Plenty Of Recreation

Nothing Has Been Neglected To Provide Amusement For Soldiers

The Y.M.C.A. has sent back word to Canada that it requires 1,400 rugby footballs, 2,000 Chinese checker boards, 5,000 checker boards, 10,000 cribbage boards, 5,000 sets of horse shoes, five gross of golf balls, 28,800 decks of playing cards and 864 sets of boxing gloves, from which it may be easily judged that the recreational side of Canadian soldiers' lives overseas is not being neglected.

SO YOU'RE GOING TO DO A PLAY?

Be it for community enjoyment or festival competition, the problems to be faced are just the same, and must be overcome, if a tip-top production is to be the result. The most important problem is securing suitable material. Many catalogues are available from dozens of publishers, but you may spend hours reading them, and for a dozen first rate plays, you, as you think, and if you secure one that will suit your purpose, you will be lucky. What's the next step? I hear you ask? Well, the next step is to write your purpose, and then a study of this thing called Drama or Theatre or Play Production and discuss the matter with them, either in a personal visit or by letter. Be sure to mention how many men and women are available and how experienced they are, also how much experience your director has had.

Consideration of the time element in play production is a very important item, and should be gone into thoroughly. Usually those who plan to sponsor plays decide they need a play in three weeks for some worthy object, the minister's salary, pants for the hockey team, or a donation for the bombed victims in Britain. No matter what the cause, give the director and the cast time to do a creditable show. Of course, if the director chosen is experienced, he won't be badgered into a hurry-up job, but these talks are for those who are doing this work for the first or second time.

Take a couple of months to do one act play if you can. Then a group of players will have an opportunity to study their parts, build up worthy characterizations and the net results will really be worth while for everybody concerned. But enough said this time. Watch again next week.—Mary Ellen.

A Winter Problem

We wonder, says the Kingston Whig-Standard, in view of the need for conserving all the steel we can in Canada for munitions production, whether it will be patriotic for householders to buy two snow shovels this winter—one for themselves and one for the neighbors?

Last bank failure in Scotland was in 1878.

R.C.A.F. NEEDS MORE

"TAIL-END CHARLIES"

More air gunners will be needed by the R.C.A.F. if it gets enough of a type of aircraft it wants, Air Minister Fowler told parliament. "Tail-end Charlies, they are called," Major Power said. "They are the men who sit in the tail end of bombing machines with all heaven above and hell below."

"They require clear grit," the air minister declared of the gunners. "They must have nerves of steel and a clear eye. We have men of that kind in Canada."

SUNDAY SCHOOL LESSON

DECEMBER 7

THE NATURE AND WORK OF THE CHURCH

Golden text: Christ also loved the church and gave himself up for it. Ephesians 5:25.
Lesson: Matthew 16:13-20, 18:15-20; Acts 2:37-47; 8:1-17; 1 Corinthians 7:17, 12:4-31; Galatians 1:13-24; Ephesians 1:13-24, 5:16, 5:25-27; Revelation 1:10, 21:1-3.
Evangelical reading: Revelation 21:1-3.

Explanations and Comments

Life in the Early Church, Acts 2:41-47. Those who at Pentecost were led to believe in Christ numbered three thousand. They were baptized and became faithful members of the Christian community or church. They were steadfast in their attention to the teaching of the apostles, lived in wonderful unity and comradeship with all, and shared in the breaking of bread and in the public prayers.

At the beginning of a meal the bread which was in the form of this, that cakes, was solemnly blessed and broken for distribution.

At first the followers of Christ made no effort to form any ecclesiastical organization. All the believers were together. They met in private houses, they used the Psalms for praise, they repeated the Lord's Prayer, and they met frequently, probably weekly, to partake of communion, which was followed by a supper, partly for its sacredness, and partly to provide food for those in need. The one condition of their fellowship was love and loyalty to their Master; they lived without friction in an absolute, equal brotherhood. The rich shared with the poor, selling their possessions for the poor, as there was need. They were not communists, but they acted upon the urge of a fine community spirit, realizing that they were God's stewards and that their property was to be used for others as well as for themselves.

They took their bread with gladness and thanksgiving. And the Lord added to them daily by those that were saved.

The Gospel of the Christian Church, Ephesians 4:11-16. Verses 11-16 form one sentence in Paul's soaring description of the goal set before the church. Some of the Ephesians were apostles, some prophets, some evangelists, and some, pastors and teachers. Their duties included the perfecting of the saints, the work of ministering, the evangelizing, building up the church, the Body of Christ.

They were all attain unto the unity of faith, and of the knowledge of the glory of God unto a fullness, not unto the measure of the stature of the fulness of Christ. This means that we are to become perfect men and women, but that, through the Christian view of God and the world which results from a personal knowledge of the Son of God, we are to strive toward the highest conception which Christ himself has given us.

Wheat Stocks

Visible Wheat Supply Reaches An All-Time High

The visible supply of Canadian wheat reached an all-time high on October 31, 1941, when 502.4 million bushels were in sight. Of this total 456 million bushels were in Canadian elevators and 20 millions in U.S. elevators, while 27 million bushels were in transit by rail or on the Great Lakes. The visible supply had been rising very slowly as the result of a delayed harvest, but in the last three weeks of October more than 23 million of an increase was noted. Export shipments, although 118 million bushels larger than in the August-October quarter of the 1940-41 season are not large enough to offset the movement from farms.—Current Review of Agricultural Conditions in Canada.

For Uninvited Guests

Director Of "V" Army In Europe Gives Advice

Colonel Britton, mysterious broadcaster of the BBC who directs the "V" army in Europe, told housewives in occupied territories to "make sure that the food and drink the Germans get is suitable for uninvited guests." "So that the food you have to give the Germans is the worst you have and that it is badly cooked," he said.

Husband: "Darling, this steak tastes like burnt leather."

Wife: "My, what strange things you eat in your life."

Health LEAGUE OF CANADA presents TOPICS OF VITAL INTEREST

COMBATING TUBERCULOSIS

Modern methods of combating tuberculosis have resulted in reducing deaths from that disease in all provinces of Canada. It is shown by Dr. A. J. W. Wright, writing in the Canadian Public Health Journal. The reductions vary from 64 per cent. in Alberta to 87 per cent. in Quebec. In Ontario it was 60 per cent. between 1921 and 1938.

One reason for improvement is, the disease is now brought to light much earlier than formerly, says Dr. Wertheim, but even now too many patients are admitted to sanatoria when their cases are already hopeless.

In order to diagnose the disease as early as possible, and before it has caused noticeable symptoms, the doctor recommends that surveys be made, especially among the following:

Contacts of known cases and deaths (ten times as liable to tuberculosis as other families); nurses and nurses in training; university and normal school students; teachers; high school and public school students; mental hospitals; mining and other industries; recruits for the army; domestic servants; mothers and Indian reserves.

Great increase is reported in the number of sanatorium beds available. There were fewer than 2,000 twenty-five years ago; this year the total will be about 11,000. Ontario's position in this respect is particularly favourable, with no waiting lists at the sanatoria and with a death rate of 28 per 100,000 as against 63.8 for the whole of Canada.

No Idle Planes

Planes Shipped To Britain From U.S. Are Put To Use

J. T. C. Moore-Brabazon, minister of aircraft production, said in the House of Commons that with one exception every airplane shipped by the United States to Britain "did not remain crated more than a few days."

Denying a report that hundreds of United States airplanes shipped to Britain had never been used, he said the exception was a type of aircraft originally ordered by the French government.

REGIONAL PRICE OFFICES TO OPEN ACROSS CANADA

Ottawa.—War-time prices and trade board officials said that establishment of 13 regional offices with regional representatives of the board were being planned.

This system will make available supplies required at convenient points from Vancouver to the Atlantic coast, with local representatives who may be consulted on any particular phase of the board's price stabilization program.

The wartime price and trade board, an assembly of all the talents—so far as trade and business is concerned—is being brought together in Ottawa.

New officials and advisers are arriving faster than anvils can be set up for them. They will assist the board in administration of the price ceiling on almost all commodities bought and sold in Canada.

They include clothing manufacturers and retail merchants. A variety of goods from furs and jewelry to bread and potatoes. Scarcely a day passes but the board announces a new appointment.

The board has taken over all but the ground floor of an Ottawa office building.

Throughout the country regional offices are being set up. For these also men must be appointed to keep watch on all lines of trade and they must have tools and staff with which to work; means of communicating with headquarters in Ottawa for instructions; means of receiving investigating and acting on possible complaints from Mrs. Smith that Mr. Jones the grocer has boosted the price of beans by a cent to forty, "so what?"

Hand-in-hand with the organization of the price control machinery the board is building an information section to keep the public informed of what it is doing and why.

F. W. Prendergast of Imperial Oil Company has been placed in charge and with him as a start—perhaps on a temporary basis until a permanent staff can be organized—are Ken Wilson, staff writer for the Financial Post; Fred Griffin, feature writer of the Toronto Star, whose assignments have taken him over the greater part of the world; and Carl Reinke of the press corps staff and formerly of The Canadian Press.

Prisoners Recaptured

Two German Airmen Escaped From British Prison Camp

London.—An official inquiry will be held into the escape of two German airmen who were recaptured after they broke from a British prison camp and stole an airplane in an apparent attempt to return to Germany.

The ministry of information announcement which confirmed the airmen's escape and recapture did not make any reference to the aircraft theft, but it is understood the machine the Germans "commandeered" was probably a small trainer craft. Earlier the Daily Express had reported the craft the airmen stole was a Royal Air Force bomber and said they were forced down near an airfield more than 100 miles from where they took off.

The Daily Express said the prisoners had posed as Netherlands when recaptured.

Supplies For Free French

Tanks And Trucks Sent From U.S. To North Africa

Washington.—United States military supplies, it was officially said, have been going to the Free French forces in North Africa for approximately three months, under an informal arrangement with Britain.

This statement followed announcement by the Free French delegation in the United States of the extension of lend-lease to the armies of Gen. Charles de Gaulle.

The supplies, re-transferred to the Free French forces after delivery to the British authorities in the Middle East, consist of tanks, trucks and "a number of other items, including ordnance."

Prisoner Of War

London.—Wing Cmdr. E. N. Ryder, D.F.C. and bar, who once escaped from his Hurricane after being trapped 30 feet below the surface of the water, is a prisoner of war in Germany. Ryder escaped from the Germans by releasing his parachute which floated to the surface and dragged him from the cockpit.

Russian Reserves

Report Of Destruction Of Red Army And War Production Is Unjustified

Geneva.—The Journal de Geneve said that German claims regarding destruction of the Red army and Soviet war production are unjustified and that German Russia reserves still exist in the Far East.

Attributing command of the Red army of the Far East to Marshal Vasily K. Blucher, the paper said he is still has 20 divisions of infantry about 360,000, "a" divisions of motorized troops and his entire force of heavy bombers untouched by the conflict in the west. Some forces from western Siberia have been drawn to the front, however, the paper said.

Marshal Blucher's whereabouts has been a mystery since about three years ago when there were indications he had been removed from the Far Eastern command.

The paper estimated Soviet production from east of the Volga at 2,000 tanks, 2,000 planes and 10,000 trucks a month. Enormous stocks of munitions were accumulated east of the Volga before the war started and these have not been drawn upon, it was said.

Russia has enough shells stored there to last through three months of heavy fighting and enough bullets for six months, the author said.

To Fill Vacancies

Large Number Of Women Working In British Post Offices

London.—One in every three post office workers has joined the navy, army, air force, civil defence services or home guard—a total of 113,000.

To help fill the vacancies caused by their enlistment, 44,000 extra women have been employed.

The number of women now employed in the post office, 96,000, is the biggest in history.

PLANNING FOR ARMY STRENGTH FOR COMING YEAR

Ottawa.—Since Canada has now completed, with the arrival of the latest troop convoy in Britain, the 1941 plans for despatch of Canadian army units overseas as outlined last February by Prime Minister King, speculation in Ottawa is turning to army plans for 1942. Such plans are closely guarded secret, but since Major General H. D. G. Crerar resigned as chief of the general staff to take command of the second division, Canadian expeditionary force centred on the Canadian corps.

A prediction that Canada will soon have a full-fledged army overseas, instead of a corps, is reported in the Toronto Star, which foresees two Canadian corps instead of one, under the command of Lieutenant General A. G. L. McNaghlin, with the rank of full general.

Canadian army strength in Britain at present consists of three full infantry divisions, an armored division, and ancillary and other units comprising in numerical strength two divisions. The total strength runs to around 125,000 men, the Toronto paper reports. In terms of modern armament, this is a sizeable force suitable to re-organize with full army status.

Already military authorities are understood to be working on army plans for the coming year, which may be decisive in the conduct of the war. If General McNaghlin became army commander as a general, there would be two lieutenant generals in command of each of two corps under him. One of them, it is expected, would be Major General Crerar, whose seniority as lieutenant general would date from the appointment last week from which he reverted two days later.

Airman Decorated

Flying Officer Receives The Distinguished Flying Cross

London.—A flying officer who piloted an aircraft from which British parachute troops were dropped into Italy early this year was decorated by the King in a recent investiture at Buckingham Palace, it was disclosed.

The nature of the award and name of the officer were not revealed. The award was not connected with the daring flight of Italy. The officer received the Distinguished Flying Cross for his part in daylight raids on Brast and La Pallice, ports of Occupied France.

GETS TWO SETS OF WINGS

It took Harold H. E. Pieman, Toronto, just 13 months to earn two sets of wings in the R.C.A.F. Harold is one of the few privileged to wear the double wings of the pilot and the single wing of observer. Chosen for special ability along with 15 other lads, Harold is now in New Brunswick taking a special course in navigation.

Need Encouragement

New York.—The Rome radio said Mussolini may leave Rome for the Libyan front "to encourage" his Italian soldiers. The broadcast was heard by NBC.

HERO OF LAST STAND AT CALAIS

Nonchalantly smoking a cigarette, Sergeant Peter M. Mitchell of the Royal British Marines is interviewed by the press in New York city after being particularly praised in a British admiralty statement covering the gallantry of 53 British marines covering a naval demolition party in the evacuation of the French channel port of Calais in May, 1940. Sergeant Mitchell was awarded the Conspicuous Cross for bringing many wounded comrades to safety "under intense machine-gun fire and dive-bombing attacks." Only 21 of the 53 marines came back.

HULL TAKES ENVOY TO WHITE HOUSE

Soburo Kurusu, chief, special Japanese envoy bearing his government's latest terms of peaceful settlement, differences in the Pacific, is shown with Secretary of State Cordell Hull, centre, and Japanese Ambassador Kichisaburo Nomura. They are entering the White House grounds in Washington to see President Roosevelt.

Announces Resignation

L. W. Brockington Gives Up Job As War-time Assistant At Ottawa

Ottawa.—L. W. Brockington, K.C., who for the past two years has been a special wartime assistant in the office of Prime Minister Mackenzie King, announced his resignation and said he would accept an invitation to deliver some addresses in Britain and to the people of the United States on Canada at war.

Mr. Brockington made public a letter to Prime Minister King in which he said personal circumstances made it necessary that on his return from Britain he should resume the practice of his profession. He said he would be associated as counsel with the Ottawa firm of Herridge, Gowing, MacTavish and Watt.

Reconnaissance Over France

R.C.A.F. Squadron Makes First Sortie With New Equipment

Ottawa.—A Royal Canadian Air Force squadron on air co-operation duties recently made its first operational sortie with new aircraft equipment, a communique issued by R.C.A.F. headquarters said.

The sortie was carried out by 24-10 Wing, Cmdr. H. W. Corby of Toronto, commanding officer, and P.O. G. C. H. Jackson of Edmonton and carried them on an offensive reconnaissance over the coast of occupied France.

Atlantic Ferry Job

Expect U.S. Air Corps May Soon Engage In This Work

Washington.—Well-informed military authorities indicated it is only a matter of time until the United States Army Air Corps "ferry command" begins flying military planes across the Atlantic to Britain.

Bombers, which already are being flown over in large numbers by the Royal Air Force ferry command, Africa, and fighters may eventually be taken across by American airmen, it was said. Their flights would supplement rather than replace those of the R.A.F. ferry command, according to these informants.

So far as is known, trans-Atlantic ferrying to date has been limited to bombers of long cruising range. Attention was focused earlier on the activities of the ferry command by a war department press release summarizing the activities of this organization.

This review said that "although up to the present time the Air Corps ferry command has not been engaged across the Atlantic, it is responsible for getting them to take-off points." Inquiry as to the significance of the reference produced an authoritative statement "the future is being anticipated."

One of the recently removed neutrality Act restrictions barring United States merchant ships from belligerent ports, it has been argued that if merchant ships can take direct routes across the ocean's surface there would appear to be no reason why the planes should not be flown across.

Fine Was Heavy

Company In London Offered Fraudulent Food For Sale

London.—"Chocolate flavoured bilgewater" was the analyst's description of a food purporting to be malted milk when it was fined the equivalent of \$150 for adulteration and offering the food for sale. The analyst said the food contained 10 per cent. cocoa and 90 per cent. weakened flour.

FARM PRODUCTS ARE EXEMPT FROM PRICE CEILING

Ottawa.—The war-time prices and trade board announced that the general ceiling which goes into effect Dec. 1 will not apply on sales of a wide range of farm products and fish between the primary producer and the dealer or processor.

Retail prices of these commodities will not be affected and must not exceed the maximum prices in effect from Sept. 15 to Oct. 11, the base period, at major markets.

A brief statement by the board said: "The ceiling order will not apply to livestock, poultry, eggs, cream, dairy butter, farm-made cheese, honey, maple syrup, fish, when sold by the primary producer to dealers, processors or manufacturers."

"If such products are sold by primary producers directly to consumers through public markets or otherwise, maximum prices which may be charged must not be higher than maximum retail prices established during the base period (Sept. 15 to Oct. 11) for the same products in the same area."

"The ceiling price order does apply in every particular to all food products sold by dealers, processors, manufacturers, wholesalers and retailers, excepting fresh fruits and vegetables."

A summary of the order released simultaneously by the prices and trade board said the move is intended to maintain "flexibility in transactions between primary producers and dealers or processors."

It was previously intimated "by spokesmen for the board that such action would be taken. They said that it was anticipated steps would be taken to see that the interests of primary producers were protected from any efforts to force down the price paid for their products because of the price-ceiling on processed and manufactured goods."

Exemption of fresh fruits, vegetables and greenhouse products from the general price-ceiling was made public several days ago.

Creamery butter and manufactured cheese are not affected by the analysis, but since they are manufactured products and all manufactured products are subject to the price-ceiling. However, milk sold by farmers to manufacturers of butter and cheese will be exempt from the ceiling.

NEW ANTI-NAZI VIOLENCE SEEN IN FRENCH AREAS

Vichy.—New anti-Nazi violence is occurring in occupied France. It was reported reliably. The Nazi military command in Paris announced a 1,000,000 franc (133,000) fine and severe curfew restrictions in reprisal for outbreaks there.

Lord G. Ernst von Schaumburg, Nazi commander in Paris, announced that in view of recent dynamic attacks against the occupation of a series of explosions which damaged German army property and equipment.

The fine was imposed upon the municipality in punishment for a series of explosions which damaged German army property and equipment.

At the same time a drastic 5 p.m. curfew was imposed for four days upon the districts of the city where the outbreaks occurred.

The Paris explosions coincided with new sabotage incidents occurring in the military zone adjoining the French coast.

One of the sabotage outbreaks occurred near Abbeville, it was reported. The second was near Noyelle. In the Noyelle attack the saboteurs employed what was described as "special technical means" and jammed a railroad switch after removing some cross ties and thus derailing a passenger train. That sabotage had been planned by the Germans, it was said to have been no casualties but property damage was caused.

The Abbeville sabotage was also directed against a railroad station. In the Paris bombings, the Germans said, no one was killed but considerable property damage was caused.

One of the Paris bombings occurred at a restaurant near the Montparnasse station requisitioned for the use of German railroad mail employees. The bomb was tossed through a window and exploded, although 17 Germans were in the restaurant. One fired on the terrorist but did not hit him.

One area hit by the curfew was the famous Latin quarter. Cafes and restaurants along the Boulevard Saint Michel and the Boulevard Montparnasse were ordered closed at 5 p.m. each day.

Joint Convoys

To Provide Co-operation Between British And U.S. Navies

Washington.—Naval sources said the North Atlantic convoy system would be reorganized in the near future to provide greater co-operation between the United States and British navies. There was a possibility that some steps would be taken to formalize joint action by the two navies to protect the convoys.

The new system, it was said, probably will be similar to that employed with noteworthy success toward the close of the last war when both British and American cargo carriers sailed in convoys under the escort of naval vessels of both nations.

Under the present arrangement—described as an "informal" one—American naval vessels provided protection not only for U.S. flag merchant ships sailing to Iceland but also to British merchantmen for a distance approximately half way across the ocean.

Selling Junk

Farmers Want Government To Buy Scrap Metal At First Hand

Calgary.—A resolution endorsed by the board of the United Farmers of Alberta central co-operative here urged the federal government to buy scrap metal directly from farmers, using war savings certificates in payment.

The board said the farmers objected to selling their scrap metal to junk dealers so they in turn may sell it to the government at a profit.

Assigned New Post

Ottawa.—Appointment of Hon. Mr. Justice T. C. Davis, associate justice of the Supreme Court, as minister of national war services as chairman of the reorganized and extended advisory committee on the Treaty and loaned industry was announced by War Services Minister Thomson.

One Plane A Day

London.—The Australian minister of aircraft production was quoted by the British Broadcasting Corporation as saying that in 1942 Australia will be producing a Beaufort fighter every day. The minister said that Australian Beaufort plane is the latest type of this craft.

Here's Quick Relief from

SINUS PAIN

Get Guaranteed Relief

One best way to get relief from sinus pain is to clear congested sinuses. A clear sinus passage can drain a few drops of mucus. A clear sinus passage can drain a few drops of mucus. A clear sinus passage can drain a few drops of mucus.

3 PURPOSE MEDICINE

(1) relieves swollen membranes of the sinuses (2) helps clear out mucus (3) relieves sinus pain

corridor outside to Dale's private office.

He came in a moment later, his triumph written in his smile.

"We won, Devona! Congratulations are in order," and held out his hands to her. "They let the little blonde off, but we've caught the big one."

"Oh, Dale! I'm so glad, so thrilled for you. You were wonderful, really!"

He intended it should only be a friendly handshake—but somehow, suddenly she was in his arms, her lips pressed hard against his.

He held her tight against his shoulder for a long moment. Then, as behind them the door swung open, shut again with a little swish, they left apart, flushing guiltily as they faced the intruder.

"It was Freda Kane!"

"Hello," Dale said quietly. "Was there something—?"

"Yes," she stared at him, her blue eyes vacant, wild. "Yes, there is. You can't send Jose to jail. You can't!"

He pinched his white face worriedly, as with a jerk, she pulled something out of her pocket.

"You can't do that to him! I'll kill him first!"

Then she fled.

Dale's leg toward her came an interlocking hand.

He crumpled to the floor almost at the girl's feet while she, still screaming, bled her face in her hands.

Instantly the room swarmed with people. Officers, clerks and a moment later the judge himself.

Numb with shock, Devona watched them lift Dale, his face deathly white, and carry him to the worn leather sofa.

"Call an ambulance!" someone shouted.

"I've got the girl!"

"Clear the corridor!"

Then the waiting shrill of a siren. At the girl's feet, she made her wait in the corridor outside the room. Wait for hours—pacing the long hall, studying every face that came out of that room for some sign, some signal.

"He's conscious now—or will be soon," a self-witted nurse told her finally. "You say you have sent for his brother?"

Devona nodded and tip-toed to the bedside. For the space of a high his eyes flickered open, found her face bent close to his own, recognized her.

"Don't go," he murmured, slipped back gain into unconsciousness.

He lay there, his eyes closed, his face pale, his hands clasped.

"I won't, darling."

Tal came finally and kept vigil over the unconscious girl.

He waited in the corridor outside the room, the long hours of the night.

And when at 4 the next morning the tide did turn, there was no more hemorrhage, and there was hope.

The doctor turned to Devona smiled kindly. "He'll be all right now."

Dale, as if corroborated by the doctor's judgment, opened his eyes, smiled at her, said, "Sure—I'm all right."

Devona bent her head. The strain of the long vigil, her relief, her surging joy sent her flying to that bedside, tears spilled down her cheeks as she sobbed.

"Oh, Dale, my darling, thank God you're alive and happy."

And pressing her face close to his, she cried her thanks in his pillow.

Dale's good arm went around her shaking shoulders kindly. "Here, honey. None of that, please."

She could stop. Not for the moment. But when she did dry her tears, pull herself together, she saw the quiet smile on Tal's face.

Dale saw it too. And when Tal, muttering something about coming back, lunged out of the room, Devona turned stricken eyes to meet Dale's.

"Now I've done it," she said. "Tal!"

"He mustn't!" Dale's face clouded with anxiety instantly. "You're a Quaker! Before he goes to stay engaged! To-morrow is your wedding day, isn't it?"

Dale's hand pointed to the window where a cold, foggy dawn was already pushing back the darkness of this past night. "Yes—my wedding day."

"Go call Tal back," Dale said, angry now. "Go tell him something—anything! Quaker! Before he goes!"

Devona flung open the door, her heels clattering a sharp staccato on the polished corridor floor as she ran to the elevator. No sign of Tal in the lobby below. His car gone from the parking space outside. Frantic she fled back to the hospital office.

"Call a taxi—quick!"

A moment later as her cab hurtled across town, Devona, for the second time, prayed that she might not be late. Because, and realizations came, she drove hour deep into her soul, if Tal succeeded in destroying himself this time because of her, Dale would never forgive her. She would never

forgive herself! Never!

She went directly to the old Brasher home. Tal had not been there since morning. Nor was there any message at her hotel. The sleepy clerk hadn't seen any one. Nor the night policeman at the office building where Tal had been working with publicity men.

By 10 o'clock that morning, Dale had been everywhere she could think of. Absolutely no trace of Tal.

Desperate, exhausted, she returned to the hospital.

Dale, when calm, was dressed now, his coat hung over the heavily bandaged shoulder, the sleeve dangling. He looked up anxiously.

"You didn't find him?"

Wearily, hopelessly, Devona shook her head. "No, not yet."

They called the police then. And every hospital and every morgue in the county. Still—no Talbot.

Dale's anxiety grew hourly. And with it, Devona's.

Why hadn't she used her head? Why had she let happen the very thing they had planned to avoid?

Three lives ruined now. And all because she'd so selfishly—so thoughtlessly—

"Please, Dale, can't I do something?" she begged, frantically. "Can't I hunt—somewhere. He must be—"

Dale nodded. "Go with you."

"But you can't! Your shoulder!"

"It's all right. Come on."

The nurse looked skeptical and the doctor shook his head, but Dale paid no attention. He merely thrust the keys into her hand, said curtly:

"You drive. We'll start with the bars."

WORLD'S WEEK

By HAROLD L. WEIR
Assoc. Editor, The Edmonton Bulletin

Marshall Petain's presence at the Congress of Vienna is believed to have been discussed at the meeting between the French chief of state, his premier and his appointee, Admiral Darlan, and Reich Marshal Hermann Goerring at Saint-Pierre-Verdun, 80 miles south east of Paris.

The congress of Vienna is to be held in January, test-informed British quarters believe. The Nazis are anxious to have Marshall Petain there representing France at the meeting which is to "settle Europe and its problems."

The new world will finally be adopted by all the Quelling governments and the Germans apparently hope by Sweden, Switzerland and Portugal as well. Details of the Vienna meeting are not being published but elaborate preparations are being made in Berlin and Vienna for the meeting at which the Nazis intend to mark the "end of the war in Europe."

Marshall Petain's presence is particularly desired by the Germans as final proof that even Britain's former ally has accepted the new order. The Frenchman is said by Vichy to promote the "integration of France within Europe" and that is taken to mean that Petain has definitely accepted the Vienna invitation.

Immediate action is required to prevent North Africa from falling into German hands, in view of the announced Free French following Vichy's dismissal of former pro-consul Gen. Maxime Weygand.

A prominent Frenchman has just arrived in London from the middle east with the strong plea that action should be taken immediately. According to him, the resistance the Allied forces would meet in French North Africa is negligible, but within a few weeks may be formidable.

If there is the same delay in going into North Africa as there was in Syria, the situation may deteriorate there as it did in Syria, in his view.

As the man who conducted the negotiations with Gen. Weygand last year on the eve of Gen. Sir Archibald P. Wavell's Libyan campaign, this Frenchman claims to know the disposition and feelings of the French colonial territories.

There are as yet relatively few Germans there, but on the other hand there is little effective obstacle to more arriving since Gen. Weygand's departure.

There are approximately 100,000 French troops in North Africa, armed only with rifles and possessing a very few immobilized planes and some armored cars, but no tanks and little ammunition. The majority of the army officers are supporters of Gen. Weygand and are anti-German.

But they are under command of Vichy Vice-Premier Jean Darlan's appointees who are collaboratorists. The bulk of the sailors and junior officers, however, are violently anti-collaborationist and would almost certainly re-

fuse to accept German orders. Gen. Weygand's dismissal was not immediately preceded by German demands for African naval bases but is probably rather a prelude to German occupation of them.

RED CROSS ISSUES AN EMERGENCY APPEAL FOR SUPPLIES FOR RUSSIA

An emergency appeal for \$500,000 for medical and relief supplies for Soviet Russia was launched by the Canadian Red Cross this week.

The funds raised in this appeal will be used to purchase medical supplies and surgical equipment, which will be shipped direct to Russia via Britain," declared Dr. F. W. Routley, national commissioner of the Society.

One of the things handicapping Russia today, he pointed out, is the lack of modern medicines, surgical instruments and operating room supplies which are so vitally necessary to combat disease and suffering under war conditions of such gigantic scale.

The appeal is being made at the request of the Dominion Government. Several million raised will be spent in Canada, and shipped through the free freight facilities of the Red Cross, which means that when the supplies reach Russia every dollar sent will mean three dollars in goods. There will be no administration costs as the organization's collecting system will be used.

The Red Cross has already sent a vast quantity of its own supplies to the Soviet Union, and a cable has been received stating that over one million articles of relief supplies have left Britain for Russia. This includes important drugs and field comforts.

The following wire was received by Provincial headquarters from the National Office: "Organized labor is urged by Tom Moore, President, Trades and Labor Congress of Canada, in a statement issued here today to support the Canadian Red Cross Society's appeal for five hundred thousand dollars for medical and relief supplies for Soviet Russia.

"The privileges and rights of labor enjoyed under democracy are imperiled by Nazi aggression," Mr. Moore declared. "The Russians have valiantly borne the brunt of attack and I know the workers of Canada are anxious to show the Russian people that they want to do everything in their power to help them bring the war to a successful conclusion. The British work ers, he pointed out, are laboring night and day producing munitions for Russia, and at the same time are helping to finance medical aid for the Soviets through the British Red Cross.

I ask all our affiliated membership throughout the Dominion to bend every effort to make the Canadian Red Cross appeal an overwhelming success in as little time as possible so that the Medical aid already sent from the Red Cross to Russia may be quickly supplemented."

LOOKING FORWARD

Regular mid-week services are held as follows:
Wednesday 8 p.m.—Intercessions, etc.
Thursday, 8:30 a.m.—Holy Communion

A special meeting of the Vestry will be held immediately after Evening on Sunday, December 14, when a report will be received from the Committee on Insurance, of which Mr. C.H. Nash is convener.

Snicklefritz

A husband and wife came to the bank to open a joint account. Being in a hurry, the husband made out his signature and left.

"Let's make an official of the bank said to his wife, 'This is to be a joint account, is it not?'"

"That's right," smiled the wife. "Deposit for him—checking for me."

"Yes, much depends on the formation of early habits."

"That's true. When I was a baby my mother hired a woman to wheel me around, and I have been pushed for money ever since."

Visitor: "My, what a large skating instructor. It's very nice."

Customer: "Mrs. Jackson has a most magnetic personality, hasn't she?"

Grocer: "Yes, everything she carries out of here is charged."

"Do you believe that clothes make the man?"

Well, a good suit has made many a lawyer."

Mrs. Briggs: "Did you ever catch your husband flirting?"

Mrs. Jiggs: "Yes, just once."

Mrs. Briggs: "What did you do to him?"

Mrs. Jiggs: "Married him."

A none too bright recruit was being physically examined.

"Any intestinal trouble?" asked the doctor.

"I don't know. It ain't been issued to me yet?" was the reply.

"Are you regular?"

"No, sir, I volunteered."

"God, son! Don't you know the Kings' English?"

AUSTRALIAN WHEAT CROP

The Australian wheat crop, the harvesting of which will start next month, is officially estimated at 166,000,000 bushels, as compared with a wheat crop of 82,639,000 in 1940 and a ten-year average of 165,000,000. The estimate earlier thought that the Australian crop would be below average this year due to early season drought, but apparently a fairly substantial recovery developed.

Brookman points out that with the carryover from last year's crop and the surplus from new production Australia will have 150 million bushels available for export and carryover. This is a somewhat burdensome supply in view of the restricted outlets and the difficulties in obtaining ocean tonnage.

ROOF-TOP BOMBER

The new Hurricane fighter-bomber, which proved so successful in the previous raids over Nazi-occupied Europe early in November, is a cleverly-devised adaptation of the famous Hurricane fighter. It carries two small and powerful bombs, one under each wing. These bombs include a delayed action device which permits the plane to drop them with great precision from roof-top height directly above the target, or by free-falling tactics. The plane is fast enough to get away in time. Accurate aiming is possible without the use of bomb-sights.

GIVE WAR SAVINGS CERTIFICATES for GIFTS

WHAT could be more practical... more appreciated and more patriotic than WAR SAVINGS CERTIFICATES for Christmas gifts? Give them to every member of your family this year.

Remember, they only cost you four dollars each and they are worth five dollars to the person receiving them.

BREAD helps keep Canadians fit

FOR PRESENT-DAY EMERGENCIES

LIFE TODAY calls for energy and vitality. And bread supplies one-fourth of the food energy of Canadians!

In fact, bread should be "me basic food in the diet of every Canadian whose work calls for quick or sustained energy."

Bread is unusually rich in carbohydrates and, with its modern milk formula, is a source of protein equal to meat in muscle building and repair.

Bread tempts and satisfies your appetite—makes you more fit for present-day emergencies. Eat more of it!

YOUR BAKER'S SKILL, scientific equipment—and the finest ingredients—give you loaf unsurpassed in wholesomeness and delicious flavor.
